Indianapolis, IN

U.S. Citizen

Front-End Developer with over 10 years of experience across various industries and verticals, from Fortune 100 companies to startups. Proficient in React and general lover of all things JavaScript / TypeScript and adjacent technologies.

Work Experience

Senior II Web Developer Front-end, Sparq - Fort Wayne, IN

Apr 21 - May 25

- Assisted in the modernization and development of a React dashboard application for a client in the Payroll / FinTech sector.
- Led front-end efforts in a long-term modernization project for internal applications for a shipping industry client.
- Provided React expertise to facilitate a client's migration of end-user facing marketing sites to a modern JavaScript stack integrated with headless CMS services.
- Mentored and supported junior developers through our junior associate program, fostering their professional growth.
- Managed a team of junior to senior-level employees, ensuring project alignment with company goals.

Senior UI Developer, Australian Gold - Indianapolis, IN

Aug 19 - Mar 21

- Oversaw the maintenance and updates of multiple client-facing applications
- Focused primarily on enhancing a management dashboard that seamlessly integrated with the Point of Sale application.
- Championed the upgrade of legacy systems to more modern technology stacks and development practices.

UI / UX Developer, Fusion Alliance - Indianapolis, IN

Apr 16 - Apr 19

- Engineered and maintained a large-scale, MERN stack, React application for a client in the insurance sector.
- Developed and maintained multiple WordPress themes, sites, and plugins, contributing to the client's online presence.
